

RENOMED

CUT OUT TO BE **TIMELESS.**

They are neither mass-produced nor machine-made.
Our scissors are manufactured by a family business located at
a historical granary building in the western part of Poland.

Each item is hand-crafted from start to finish.
Manually measured and finely adjusted to provide a unique pair
of scissors. Designed to perfectly fit your hands. Sharpened to
ensure a precision cutting action throughout decades of use.
Unique. Desirable. Designed to last.

OUR STORY

Brilliant Idea, Beautiful product.

Marek Ruciński
Company Founder

We take pride in our unique manufacturing process. Each pair of scissors is made by skilled craftsmen to create a truly remarkable, high-quality product.

Renomed is a family-owned business that was established by Donata and Marek Ruciński in 1981. The original product design was created by Donata while husband Marek took charge of the unique manufacturing and quality assurance process. Their sons joined the business and manage it today, but the goal has remained unchanged since the beginning: to manufacture unique scissors with timeless appeal.

Our company has a trading history stretching back decades. The original product – with its acute attention to detail – has been recognised by the design community and received international design awards.

Today our scissors – which are made at a historical granary building located in the western part of Poland – are exported to 15 countries all over the world.

Michał i Maciej Rucińscy

A scissors design which has
remained unchanged since
it was first conceived.

With their perfect shape
unchanged since 1981,
the scissors are timeless.

Designer of Renomed scissors

OUR PROCESS

Design that lasts a lifetime

What makes our products stand out is their **unique shape**.
But apart from making beautiful products, we take pride in our
manufacturing process that reduces waste to boost **sustainability**.

Each pair of scissors is made of two blades that are **bent** and joined in a way that means they cannot be separated. The **extra-fine blades** ensure a smooth and precise cutting action.

Each pair is handmade by **master craftsmen** who check it for sharpness and precision. The scissors are **tempered, polished and sharpened** manually.

Our scissors are made of **high quality stainless steel** which can be **sterilised and disinfected**. Renomed scissors are registered as medical instruments and put safety first.

AWARDS

Design at its very best

The concept of precision. Renomed scissors connect simplicity with innovation. Donata Rucińska designed a complete product. Scissors made with perfect functionality, using the best manufacturing process and with minimal waste. Recognised in many international award programmes for their original design.

Care Instructions

Renomed scissors are designed to remain sharp and last a lifetime. Their shape and unique production provide unbeatable sharpness and longevity.

1. MEDICAL STANDARDS

Thanks to the technology and materials used in the production process, the scissors can be disinfected or even sterilised, if needed.

2. WET ENVIRONMENT

Exposure to moisture and water won't damage the scissors, but you should dry them thoroughly to prevent rust.

3. MAINTENANCE

The scissors are designed to last a lifetime, but if they no longer open and close smoothly, simply apply a drop of machine oil between the blades near the screw to help prevent friction.

4. SAFETY

Products manufactured by Renomed are checked for quality and comply with the EU safety, health and environment protection requirements. They have the CE marking.
